- Definition / Purpose
- Committee Structure
- Mission & Core Goals
- Scope of Work
- Guiding Principles
- Deliverables
- A short version for bylaws or website

Dos/Donts

Purpose- accomplishing objectives NOT debating, rehashing, questioning, correcting etc

Not gendered

Not personal/argument ; yelling; cut off etc

Committee Goals

PACCS Committees will develop attainable goals for projects and action items. The committee members will have input and knowledge of the goals included anticipated deadlines. These goals should be written with specific, measurable terms. Regular progress monitoring and editing of goals will ensure success.

> Every PACCS committee must create goals that are objective and measurable. That means each goal must specify the exact product we're creating, who it's for, what standard it must meet, who is responsible, and when it must be done.
>
> For example: 'Create three 30–60 second videos explaining PACCS Master Concepts for legislators by January 1, led by Member X.'
>
> These goals help us stay accountable, track progress, and ensure we're producing real outcomes that advance child-centered safety.

✅ Objective, Measurable Committee Goals

Committees must move from broad mission → to clear, trackable outcomes.

> Every committee goal should say WHAT will be created, WHO is responsible, HOW it will be delivered, and BY WHEN.

This keeps the work:

- Objective (anyone can see if it was done)
- Measurable (there is a number, product, or deadline)
- Action-driven (not theoretical)
- Assignable (someone owns the task)

✅ PACCS Objective Template

Objective Format: Action Verb + Product + Audience + Measurable Standard + Deadline + Responsible Member

Template:

> "The Committee will [*create/develop/provide*] [*specific product*] for [*audience*], ensuring [*deliverable/quantity/standard*], and complete this task by [*deadline*], led by [*member/role*]."

This template gives every objective:

- a verb
- a deliverable
- an audience
- a metric
- a deadline
- a responsible person

✅ Example Objectives for the Policy, Education & Public Outreach Committee

1. Educational Materials

The Committee will create educational resources in multiple modalities (PDFs, one-page briefs, infographics, short videos) to educate legislators, the public, and courts, ensuring at least 3 products per audience, by January 1, 2026, led by Member X.

2. Use PACCS Master Concept List

The Committee will convert PACCS Master Concept List topics into 30–60 second educational videos explaining terms such as “coercive control,” “emotional abuse,” and “child psychological safety,” producing at least 5 videos by January 1, 2026, coordinated by Member Y.

3. Audience-Specific “Asks”

The Committee will develop a clear advocacy ask for each audience:
• Legislators: Request a meeting to present evidence & recommendations.
• Courts: Offer judicial and professional trainings on child-centered safety.
• Public: Provide awareness toolkits and shareables explaining warning signs of alienation and false allegations.
These asks will be finalized and approved by December 15, led by Member Z.

4. Distribution Plan

The Committee will send educational briefs and videos to Judiciary Committees in PA, TX, and FL by January 1, coordinated by Member X, who will compile the email list, and executed by PACCS through official mailing.

5. Follow-Up

Member Y will conduct follow-up outreach to each state’s judiciary staff within 14 days of distribution, and report responses at the next committee meeting.

A. Concept & Definition Mastery (ex-Master List of Concepts)

Identify which audience for the concepts -

Audience Targets(legislators, courts, public) —and the committee's output—will be able to:

- Define parental alienation clearly, accurately, and scientifically
- Define Parent-Child Contact Problems
- Child abuse- pointing out ALL Abuse is equal
- Including Child Centered Safety in Best Interests
- Clarify actual law- related definition, overlap
- DV handling by area (LAP, Screener, Arrests, stand alone) flow chart https://docs.google.com/document/d/15opjWlBpJWqCQS187EdkapNg1CGcfbEG/edit
- Misinformation regarding DV, custody
- Misinformation regarding research
- Misinformation for kayden specific
- Credibility of testimony/"data"
- Distinguish alienation from estrangement and normal separation distress
- Explain child resistance, enmeshment, trauma bonding, triangulation (healthy/unhealthy forms)
- Explain child abuse and the criminal stutues (https://docs.google.com/document/d/1LnNOZyDBDpvGoQXPZH7-_c4LjhgbpGUg/edit?usp=drivesdk&ouid=111060731146578147385&rtpof=true&sd=true Lilly's doc
- Education on child protections statutes
- Identify red flags of coercive influence
- Explain risk factors for children resisting contact
- Understand *and communicate* the research on emotional & psychological harm
- Define false allegations as a tactic of coercive control and alienation
- Explain why parental alienation is child abuse (supported by research, DSM, ACEs, science, etc.)
- Clarify what ethical reunification practices are and are not
- Debunk common myths (e.g., "children never lie about abuse," "if a child resists it must be for a reason," "PA is debunked," etc.)
- Diagnostic/DSM-

Policy, Education & Outreach Committee

Develops educational materials, public campaigns, and legislative briefings to promote evidence-based reform & raise awareness about child- centered safety.

PACCS Committee on Policy Education & Public Outreach

1. Committee Definition

The **Policy, Education & Public Outreach Committee** is responsible for designing, coordinating, and delivering high-quality educational materials that correct misinformation, illuminate the evidence-based science of child psychological safety, and support better decision-making across courts, public systems, legislative bodies, and communities.

The Committee serves as PACCS's public-facing education arm. Its core mission is to ensure that child safety is understood holistically—including emotional and psychological safety—and that stakeholders are equipped with accurate information about parent–child relationships, resistance/estrangement dynamics, parental alienation, false allegations, and effective, ethical approaches to healing family relationships.

2. Core Purpose

1. Educate and Inform

To provide courts, legislators, agencies, and the public with clear, research-grounded knowledge regarding PACCS child centered safety using a defined set of mastery concepts grounded in peer-reviewed science and professional standards.

2. Correct Misinformation

To identify and counter myths, agenda-driven narratives, and public confusion related to child-centered safety by presenting accurate data & high-quality research. With a focus on clarity, precision, and responsible use of terminology.

3. Guide Decision-Makers

To equip professionals and policy leaders with consistent, micro-dosed, evidence-aligned information and practical, structured tools that support child-centered decision-making in custody, safety, and intervention contexts. Educational materials shall be designed to enhance understanding and risk awareness without directing legal, clinical, or judicial outcomes.

4. Promote Public Awareness

To increase societal understanding of emotional and psychological child safety by highlighting risks associated with harmful dynamics such as coercive control, parent–child cut-offs, role-reversal, false allegations, splitting, and pressured or influenced resistance. The Committee shall also provide the public with general, non-directive guidance to support child-centered safety—while offering cautionary information to help individuals and institutions avoid

inadvertently participating in behaviors that contribute to alienation or harm (e.g., school-based practices).

---

5. Educational Strategy and Audience-Specific Delivery (HOW)

To ensure effectiveness, integrity, and ethical compliance, the Committee shall:

- Determine the most appropriate educational medium for each learning objective and audience, including but not limited to visual materials, infographics, one-page briefs, short videos, presentations, or written resources.
- Tailor content and format by audience, recognizing the distinct roles, ethical constraints, and informational needs of:
    - Judiciary
    - Executive and legislative officials
    - Child protection and child-serving agencies
    - Law enforcement
    - Legal and mental health professionals
    - Educational institutions and the general public
- Clarify the purpose of each outreach effort, including whether the communication:
    - Presents information only;
    - Offers access to training, research, or consultation; or
    - Invites dialogue, meetings, or collaborative review—without advocacy inconsistent with professional or judicial ethics.
- Ensure all materials remain educational and non-directive, aligned with PACCS's bylaws, ethics policies, and applicable professional standards.

,

3. Committee Structure

Chair- Responsible for strategic direction, oversight, coordination with other committees, and delivery of annual education plans.

Sub-Teams / Working Groups

A. Research Translation Team (collaborate with Research Integrity)

- Translates peer-reviewed evidence into accessible, plain-language guides or messages
- Creates infographics, briefs, bench cards, policy summaries, and other content
- Maintains consistency with PACCS research standards

B. Stakeholder Education Team

- Markets, shares and informs of PACCS tailored trainings for:
    - Courts & judges
    - Legislators & policy staff
    - GALs, custody evalua tors, guardians, attorneys
    - Educators, schools, and community organizations
- Designs presentation decks, arrange presentations and workshops

C. Public Messaging & Media Team (collaborate with Lived Experience)

- Designs social media campaigns
- Oversees press releases and public fact sheets
- Responds to misinformation in the media (collaborate with Research Integrity)
- Creates educational videos and online learning modules

D. Resource & Toolkit Development Team (collaborate with Training, Lived Experience & Research Integrity)

- Produces child-centered guides
- Develops “How to Understand Resistance” toolkits
- Curates alienation identification guides
- Suggest accessibility of the resource library for families and professionals

E. Legislative Outreach Team (collaborate with Lived Experience & Research Integrity)

- Provides nonpartisan briefings to lawmakers
- Drafts policy one-pagers

- Creates data-driven testimony templates
- Tracks emerging legislation

---

5. Strategic Outreach Priorities

1. **Educate Courts**
    - Judicial bench cards (1-page quick reference (Developed by Training & Curriculum)
    - Continuing legal education (CLE) modules (Developed by Training & Curriculum)
    - Guides on how to interpret resistance (Developed by Training & Curriculum)
    - Evidence-based definitions of coercive parenting, role-reversal, and enmeshment
    - Statistics on false allegations, fabricated abuse claims, and litigation abuse
2. **Educate Legislators**
    - Public service announcements, microdosed consistent facts organized by topic
    - Legislative briefings
    - Child-safety-focused policy one-pagers
    - Talking points to prevent misguided bills
    - Explanation of the public harm caused by misinformation
3. **Educate the Public & Media**
    - Clear messaging campaigns on child psychological safety
    - Infographics that explain alienation as a form of abuse
    - Narratives that emphasize emotional harm from parent–child separation
    - Information on ethical, non-coercive, science-based reunification
4. **Set the Record Straight**

    The Committee will collaborate with Research Integrity to develop:

    - "Fact vs. Myth" series (alienation, false allegations, family court data)

- Annual State of Child Safety Report
- Response templates to misinformation in media, hearings, or social platforms

---

6. Educational Framework

All committee content will adhere to PACCS's Five Pillars of Child-Centered Safety:

1. **Emotional Safety**

   — Protecting the child's right to stable, secure attachment with safe caregivers.

2. **Psychological Health**

   — Preventing the cultivation of fear, rejection, role-reversal, or parentification.

3. **Truth & Evidence**

   — Grounding all decisions in validated research and clinical standards.

4. **Protection from Abuse of Systems**

   — Recognizing that false allegations, litigation abuse, and coercive influence are forms of harm.

5. **Family Preservation & Healing**

   — Supporting rebuilding of relationships through ethical, evidence-based interventions.

---

7. Expected Deliverables

Within Year 1, PACCS will produce:

- Definitions & terminology handbook
- "Understanding Resistance" guide (courts / public)
- Alienation identification checklist
- False allegations educational brief

- Legislative policy briefs
- Social media and public campaigns
- Annual report on misinformation trends
- Standard training presentation for courts and agencies
- Reunification FAQ (based on science, not misinformation)
- Public child safety video series

---

8. Summary Description (for bylaws, website, or announcements)

The PACCS Policy Education & Public Outreach Committee develops and delivers evidence-based educational resources that elevate public understanding of children's emotional and psychological safety. The committee creates strategic communication plans, corrects misinformation, informs policy leaders, and equips courts and communities with tools to identify alienation, understand child resistance, recognize the role of false allegations, and protect the parent–child relationship. Through research translation, public messaging, legislative engagement, and multi-disciplinary training, the committee ensures that every stakeholder has accurate, child-centered knowledge to make safe, ethical decisions for families.

One pager

PACCS Committee Guide: How to Create Objective, Measurable Goals

1-Page Onboarding Handout

PACCS committees transform mission into measurable action. To stay focused, accountable, and effective, each committee must write goals that are objective, measurable, assignable, and time-bound.

1. Why We Use Objective Goals

Objective, measurable goals help committees:

- Produce real outcomes (not vague intentions)
- Stay aligned with PACCS priorities
- Assign responsibility clearly
- Track progress over time
- Report accurate updates to the Board

---

2. The PACCS Objective Formula (Use for Every Goal)

Each objective must include:

1. Action Verb – What will be done
2. Deliverable – The product or outcome
3. Audience – Who it's for
4. Measurable Standard – Quantity or performance level
5. Deadline – When it will be completed
6. Responsible Person – Who owns the task

Objective Template (copy/paste):

"The Committee will [create/develop/provide] [specific product] for [audience], ensuring [deliverable/quantity/standard], and complete this task by [deadline], led by [member/role]."

3. Examples (Policy, Education & Public Outreach Committee)

A. Educational Resources

The Committee will create educational resources (PDF one-pagers, infographics, micro-videos) for legislators, courts, and the public, producing at least 3 resources per audience by January 1, led by Member X.

B. Master Concept List Videos

The Committee will convert PACCS Master Concept List topics into 30–60 second videos explaining key child-safety concepts, producing 5 completed videos by January 1, led by Member Y.

C. Targeted "Asks" for Key Audiences

The Committee will draft 1 clear advocacy ask per audience:
• Legislators – request a meeting to discuss reforms
• Courts – offer judicial & evaluator trainings

• Public – distribute awareness kits
Completed by Dec 15, led by Member Z.

D. Outreach & Distribution

The Committee will send PACCS educational materials to Judiciary Committees in PA, TX, and FL by January 1. Member X will compile emails; PACCS leadership will send the distribution email.

E. Follow-Up Tracking

Member Y will follow up with each state judiciary office within 14 days to confirm receipt and request meetings, and will report outcomes at the next committee meeting.

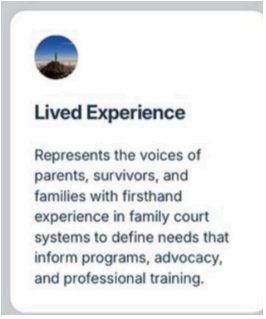
---

4. Best Practices for Committee Success

- Keep objectives task-driven and time-bound
- Assign each objective to a specific member
- Break large goals into smaller deliverables
- Share progress at each Board meeting
- Use the same template for consistency across PACCS

Lived Experience Committee

Lived experience is the firsthand, direct experience of individuals who have personally encountered a system or issue—such as the family court system, false allegations, coercive control, or parent–child separation. This perspective provides essential insight into how policies, procedures, and decisions impact real people, especially children and families. Lived experience exposes gaps, unintended harm, and opportunities for reform that may not be visible through data or professional expertise alone.



Represents the voices of parents, survivors, and families with firsthand experience in family court systems to define needs that inform programs, advocacy and professional training.

PACCS Lived Experience Committee

Definition, Structure, and Goals

---

1. Committee Definition

The **Lived Experience Committee** is composed of individuals who have personally navigated the family court system, false allegations, coercive control, parent-child separation, reunification challenges, or other forms of child-safety–related adversity. The committee exists to ensure PACCS's work is grounded in the real-world realities families face.

"Lived experience" refers to the first-hand, direct experience of navigating systems, trauma, injustice, or interventions—providing insights that cannot be accessed through research or clinical training alone. The committee's purpose is to elevate those experiences into policy guidance, education, and institutional reform.

This committee serves as a bridge between affected families, professionals, and policymakers, ensuring every PACCS initiative reflects the true needs of children and parents harmed by system failures.

---

2. Committee Purpose

The Lived Experience Committee ensures that:

- Policies are informed by the families most impacted by them
- PACCS's training, education, and advocacy reflect practical, real-world realities
- Survivor voices shape standards, reform, and solutions
- No child's emotional or psychological well-being is overlooked
- Harm caused by systems, false allegations, coercive control, alienation, and inequitable interventions is accurately understood and represented

This committee protects PACCS's mission from becoming purely theoretical or academic by grounding recommendations in actual human impact.

3. Committee Structure

Chair / Co-Chairs

- Facilitate meetings
- Coordinate collaboration with Policy, Clinical, Law, and Research Committees
- Review materials for accuracy and alignment with lived experience realities
- Manage membership and support needs

Working Groups (sub-teams)

1. **Story & Testimony Team**
   Helps families ethically and safely share testimony for training, policymaking, and public education.

2. **Quality Assurance & Review Team**
   Reviews PACCS publications, trainings, and policy recommendations to ensure they reflect real lived experience.

3. **Systems Accountability Team**
   Identifies recurring patterns of harm (alienation, false allegations, coercive parenting, mishandled investigations, court bias).

4. **Community Engagement Team**
   Connects with PACCS members, parents, and youth to gather feedback that informs reform.

Membership

- Individuals with direct experience
- Parents, grandparents, adult children of alienation, and survivors
- Advocates with long-term system involvement
- Members vetted for ethical conduct, confidentiality, and safety

4. Committee Goals

A. Integrate Lived Experience Into PACCS Standards

- Ensure standards for clinicians, GALs, attorneys, and evaluators reflect real-world child safety experiences
- Elevate missing perspectives concerning emotional & psychological harm

- Identify where policy diverges from lived reality

B. Support Policy Reform Provide direct input on:

- Custody legislation
- Court safety standards
- False allegation reform
- Alienation recognition
- Reunification oversight
- Child mental health policies

Lived experience identifies what is working, what is harmful, and what needs immediate reform.

C. Improve Education & Training Advise on:

- Judicial training modules
- Law enforcement training
- School & community training
- Mental health continuing education
- Public education campaigns

Lived experience ensures training focuses on the actual harms children face, including psychological injury, coercive control, and system misuse.

D. Protect the Authenticity of PACCS Messaging The committee acts as a safeguard, ensuring PACCS:

- Accurately represents survivors
- Avoids perpetuating misinformation or bias
- Uses language that resonates with real families
- Honors trauma-informed practices
- Avoids professional tunnel vision

E. Identify System Gaps and Harm Patterns Use member insights to identify:

- Predictable patterns of alienation
- Common misuse of false allegations
- Court blind spots
- Harmful evaluator practices
- Failures in therapist training
- Agency blind spots (CYS, school, DV centers)

This helps PACCS propose practical, evidence-based, survivor-informed solutions.

---

5. Scope of Work

The Lived Experience Committee will: Review *all major* PACCS educational materials prior to publication

- Provide recommendations for improving procedural fairness in court
- Review legislation and policy proposals for survivor impact
- Assist the Public Outreach Committee with lived-experience grounding
- Contribute to training videos, panels, case examples, scenarios
- Develop anonymized case examples to help professionals understand emotional harm, coercion, and alienation
- Compile data on recurring systemic failures and proposed remedies
- Host listening sessions and roundtables
- Provide mentorship opportunities for new members navigating the system
- Collaborate with the Research Committee to ensure studies incorporate real-world variables

---

6. Guiding Principles

1. **Child-Centered Safety**

   Lived experience tells us where systems fail children emotionally, psychologically, and developmentally.

2. **Trauma-Informed Practice**

   Members' stories are handled with care, confidentiality, and dignity.

3. **Integrity & Accuracy**

   Lived experience informs decisions—but does not replace research or professional standards; it complements them.

4. **Non-Adversarial Voice**

   Advocacy is focused on reform, healing, and systemic improvement, not blame.

5. **Diversity of Experience**

   Every story is unique; the committee values range of adversity and background.

6. **Responsible Storytelling**

   Experiences must be shared ethically, safely, and without re-traumatization.

---

7. Committee Deliverables (Year 1)

- Lived Experience Integration Framework for PACCS committees
- Testimony bank (anonymous case summaries)
- Trauma-informed guidelines for educational storytelling
- "Lived Reality Check" process for *all* PACCS publications
- Annual "Lived Experience Impact Report" highlighting system failures and reform opportunities
- Short training videos for professionals using real-case scenarios
- Public Education resources grounded in survivor narratives
- Role-play scripts for training evaluators, judges, GALs
- Collaboration with Research Committee on studies involving alienation and child safety

---

8. Short Version (for bylaws, website, or onboarding)

The PACCS Lived Experience Committee ensures that the voices of those directly affected by family court failures, false allegations, alienation, and child-safety issues guide all PACCS initiatives. The committee provides first-hand insight into how policies, practices, and decisions impact real families. Members help evaluate PACCS materials, inform policy reform, support training development, and identify recurring system failures. The committee ensures PACCS remains grounded in real-world realities, trauma-informed values, and child-centered safety.

PACCS LIVED EXPERIENCE COMMITTEE – ONBOARDING GUIDE (1 Page) **Welcome**

Thank you for joining the PACCS Lived Experience Committee. Your firsthand insight into the realities of family court, false allegations, coercive control, parent–child separation, and reunification barriers is essential to PACCS's mission of protecting children and advancing ethical, evidence-based reform.

Your lived experience is not just a personal story— It is expertise. It is data. It is a roadmap for change. Your perspective helps prevent harmful practices, correct misconceptions, and guide reform.

Committee Purpose The Lived Experience Committee ensures all PACCS policies, trainings, standards, and public-facing materials reflect the real-world realities families experience. The committee provides critical insight into:

- Emotional & psychological harm
- Alienation dynamics including False allegations
- Coercive control
- System failures and blind spots
- Inequities in investigations, custody decisions, and services

What the Committee Does

- Reviews PACCS training, publications, and policy recommendations
- Provides feedback to ensure accuracy and survivor-centered language
- Identifies recurring patterns of harm in courts, CYS, schools, and mental-health systems
- Helps develop educational scenarios, case examples, and testimony
- Supports legislative and judicial education efforts
- Participates in roundtables, listening sessions, and outreach projects
- Works with other Committees to integrate survivor-informed practices

Your Role As a committee member, you will:

- Share insights safely and at your comfort level
- Provide feedback on materials and proposals
- Participate in monthly or bi-monthly meetings
- Uphold confidentiality and trauma-informed principles
- Support system change driven by children's emotional and psychological well-being

Guiding Values

- Child-Centered Safety: Emotional and psychological safety come first.
- Trauma-Informed Practice: Your story is handled with care and dignity.
- Integrity: Lived experience complements science, not replaces it.
- Respect: Differences in experience and perspective are valued.
- Accountability: We address system failures honestly and constructively.

What You Can Expect

- A supportive, collaborative environment
- Clear tasks and opportunities for involvement
- Flexibility based on your comfort and availability
- Opportunities to shape PACCS training and reform
- A meaningful role in improving outcomes for children and families

Contact The Committee Chair is your point of contact for all questions, ideas, and support needs.

Welcome to PACCS. Your lived experience is changing the future of child-centered safety

PACCS Lived Experience Committee Chair – Role Description

Position Summary

The Chair of the Lived Experience Committee leads PACCS's survivor-informed initiatives by ensuring that firsthand experiences with family court, alienation, false allegations, coercive control, and child-safety failures guide PACCS's standards, training, and policy recommendations. The Chair elevates lived experience as a key form of expertise that supports ethical, trauma-informed reform.

Key Responsibilities

1. Strategic Leadership

- Establish the committee's annual priorities and scope of work
- Ensure all insights align with PACCS's mission of child-centered safety
- Serve as the bridge between lived experience and PACCS leadership
- Coordinate with other committees (Policy, Clinical, Law, Research, Outreach)

2. Committee Facilitation

- Schedule and lead committee meetings
- Support members in sharing insights safely and appropriately
- Uphold trauma-informed and confidentiality standards
- Ensure respectful, inclusive, and collaborative discussion

3. Oversight of Lived Experience Integration

- Review PACCS educational materials, policy proposals, and training modules
- Identify missing lived-experience perspectives and propose corrections
- Evaluate whether PACCS content accurately reflects survivor realities
- Ensure survivor voices remain central in reform efforts

4. Systems Insight & Issue Identification

- Track recurring patterns: alienation, system misuse, coercive control
- Identify gaps in professional training and public understanding
- Offer recommendations for improving child-safety practices
- Assist in developing anonymous case examples for training

5. Collaboration & Representation

- Work closely with Research Committee to incorporate lived-experience variables
- Support legislative outreach with survivor-informed analysis
- Coordinate with the Public Outreach Committee for storytelling initiatives
- Represent the committee in board meetings as needed

6. Communication & Member Support

- Serve as the primary contact for committee members
- Ensure participation is voluntary, trauma-informed, and empowered
- Assign tasks based on member comfort and skill level

Qualifications

- Significant direct experience navigating the family court system, alienation dynamics, or systemic barriers
- Strong communication and collaboration skills
- Ability to lead with neutrality, professionalism, and compassion
- Commitment to ethical advocacy and trauma-informed practices
- Willingness to integrate lived experiences with research and clinical evidence

---

Time Commitment

- Approximately 6–10 hours per month including:
    - Meetings
    - Review of PACCS materials
    - Coordination with other committees
    - Optional participation in training or advocacy events

Reporting Structure

- Reports to: Executive Director & President of PACCS
- Collaborates with: All PACCS committees
- Supports: Members with lived experience

Purpose Statement

The Chair ensures that PACCS's work remains grounded in the real-world experiences of families impacted by system failures. By integrating survivor insight into every level of PACCS programming, the Chair strengthens the organization's ability to create ethical, practical, and transformative reforms that protect children's emotional and psychological well-being.

PACCS Research Integrity Committee

Definition, Structure & Goals

1. Definition

The **Research Integrity Committee (RIC)** ensures that all PACCS materials, trainings, public statements, policy recommendations, and educational content are grounded in accurate, verified, evidence-based research.

The committee functions as PACCS's quality-control body—responsible for evaluating the scientific validity, factual accuracy, and integrity of any research, data, or claims used within PACCS or presented to the public.

The RIC also monitors current policies, legislation, and emerging practices affecting child-centered safety nationwide, ensuring PACCS remains current, scientifically grounded, and responsive to threats that may endanger children's emotional and psychological well-being.

2. Purpose

The Research Integrity Committee exists to:

A. Protect Scientific Accuracy

Verify that all claims, citations, statistics, and terminology used by PACCS are:

- Accurate
- Evidence-based
- Peer-reviewed
- Free from distortion, bias, or agenda-driven manipulation

B. Identify & Flag Misinformation

Act as PACCS's early-warning system by monitoring:

- Public misinformation campaigns

- False or misleading claims about alienation, reunification, child resistance, coercive control
- Anti-science narratives that threaten child safety
- Media inaccuracies or advocacy-group distortions
- Inaccurate use of research in court or legislative settings

C. Monitor Policy, Legislation & Practice Trends

Continuously evaluate:

- State and federal legislation affecting custody, child safety, mental health, parental rights, and court processes
- Court rules, agency policies, professional guidelines
- Harmful or unsafe emerging trends
- Positive reforms and best practices worth highlighting or supporting

RIC identifies both:

- Threats to child-centered safety
- Opportunities for PACCS to engage, educate, correct, or endorse

D. Support Evidence-Based Advocacy

Provide researchers, clinicians, policymakers, and PACCS leaders with:

- Verified summaries of current scientific research
- Fact sheets and myth-busting guides
- Literature reviews
- Data analysis
- Research briefs for legislative testimony

---

3. Committee Structure

Committee Chair

- Leads the committee and ensures all research vetting processes are executed
- Oversees sub-teams
- Coordinates with the Executive Director, President, and Policy Committee
- Presents findings and alerts regarding misinformation or policy threats

Sub-Committees / Working Groups

A. Fact Verification & Evidence Review Team

- Validates statistics, claims, citations, and references
- Reviews content from other committees for accuracy
- Confirms ethical and scientific integrity in PACCS publications

B. Policy & Legislation Monitoring Team

- Tracks national and state-level legislative activity
- Flags harmful or misleading bills affecting families and children
- Prepares summaries and rapid-response recommendations

C. Misinformation Monitoring & Analysis Team

- Identifies problematic media narratives, advocacy campaigns, pseudo-science
- Monitors influential organizations or individuals spreading misinformation
- Produces internal alerts and public clarifications

D. Research Summaries & Literature Review Team

- Produces plain-language summaries of peer-reviewed research
- Maintains PACCS's Research Library indexing system
- Supports PACCS training, education, and public outreach

---

4. Core Goals

A. Ensure Scientific Integrity Across PACCS

- Vet all research, facts, and citations
- Ensure proper context and accuracy
- Prevent misuse or misinterpretation of science

B. Protect Child-Centered Safety

Evaluate whether research, policies, or professional practices:

- Protect or threaten children's emotional and psychological well-being
- Promote or undermine the parent–child bond
- Address or ignore risks of coercive control, manipulation, and alienation

C. Monitor National Trends & Legislation

Track and classify emerging policies as:

- Supportive of child-centered safety
- Potentially harmful
- Clearly dangerous or scientifically unsound

Examples include:

- Bills limiting recognition of psychological abuse
- Policies encouraging child-led severance
- Legislation affecting reunification, therapy, investigations, CYS reform, or evidence standards

D. Counter Misinformation

- Identify falsehoods about alienation, coercive control, psychological harm, or reunification
- Issue internal advisories and public myth-busting statements
- Support PACCS leadership with accurate talking points

E. Support Advocacy & Education

Provide clear, accurate research summaries to:

- Legislators
- Judicial educators
- Media
- Partner organizations

Ensure all PACCS content—including CEU/CLE trainings—is scientifically grounded.

F. Build a Trusted Evidence Resource

Maintain a PACCS Research Library organized into:

- Key Studies
- Systematic Reviews
- Measurement / DSM & Diagnostic Issues
- Treatment & Clinical Practice
- Legal Research
- Misinformation & Corrections

---

5. Guiding Principles

- Scientific Accuracy — We rely on evidence, not ideology.
- Transparency — Findings are clear, sourced, and open to review.
- Neutrality — The committee is nonpartisan and non-adversarial.
- Child-Centered Safety — Research is interpreted through the lens of children's emotional and psychological well-being.
- Integrity — We correct errors quickly and publicly.
- Courage — We confront misinformation wherever it appears.

---

6. Deliverables (Year 1)

- PACCS Research Integrity Protocol (fact-checking framework)
- Quarterly Misinformation Watch Report
- Rapid-Response Alerts on harmful legislation
- Research-based Myth vs. Fact Sheets (alienation, false allegations, reunification, child resistance)
- Policy Briefing Book with verified research summaries
- Collaboration with Education & Outreach on evidence-vetted training content
- Review process for external speakers or experts
- Annual State of Research Report on child emotional & psychological safety

---

7. Short Version (for bylaws, onboarding, or website)

The PACCS Research Integrity Committee safeguards the scientific accuracy of all PACCS work. It verifies facts, monitors research, tracks legislation, and identifies misinformation or policy threats that affect child-centered safety. The committee ensures that PACCS remains a trusted, evidence-based authority by reviewing publications, advising on best practices, and producing research summaries and alerts. Through rigorous evaluation and continuous monitoring, the committee protects the integrity of PACCS's mission to promote emotional and psychological safety for children and families.

PACCS RESEARCH INTEGRITY COMMITTEE – ONBOARDING GUIDE (1 Page) **Welcome**

The Research Integrity Committee (RIC) serves as PACCS's scientific backbone and quality assurance team. Our mission is to ensure every PACCS publication, training, statement, and policy recommendation is accurate, evidence-based, and protective of child-centered safety, especially children's emotional and psychological well-being. This committee helps PACCS remain trusted, credible, and accurate.

You were selected because your skills, insight, and analytical abilities strengthen PACCS's commitment to truth, accuracy, and scientific credibility.

Purpose of the Committee The RIC exists to:

- Verify research, facts, citations, and statistics used across PACCS
- Monitor current laws, policies, and practices that affect child safety
- Identify misinformation and emerging threats to children's emotional and psychological well-being
- Flag harmful or beneficial legislation across the country
- Provide vetted research summaries for PACCS education, outreach, and advocacy
- Ensure science-based standards guide clinical, legal, and public-facing materials

What the Committee Does

- Fact-checks content created by all PACCS committees
- Reviews academic literature and summarizes key studies
- Tracks state and federal legislation impacting child safety
- Monitors misinformation campaigns, public narratives, and biased advocacy
- Produces internal alerts on emerging risks
- Supports testimony, educational materials, and public messaging
- Collaborates with the Clinical, Law & Policy, Education, and Outreach Committees

Your Role as a Member You will:

- Participate in monthly meetings
- Review assigned research or legislation
- Help vet content before publication
- Provide insights on potential misinformation or risk areas
- Assist in preparing summaries, myth–fact sheets, and alerts
- Uphold PACCS's scientific, ethical, and child-centered values
- Maintain neutrality, confidentiality, and professionalism

Guiding Principles

- Accuracy – We protect the truth.
- Objectivity – We evaluate research, not ideology.
- Child-Centered Safety – Emotional & psychological well-being guide all analysis.
- Integrity – We act with transparency and intellectual honesty.
- Courage – We call out misinformation wherever it appears.
- Collaboration – We support every PACCS committee with evidence.

What You Can Expect

- A respectful, science-driven environment
- Clear tasks and predictable workflows
- Support from the Chair and sub-team leads
- Opportunities to strengthen national child safety reform
- A meaningful role in safeguarding evidence-based practice

Welcome to PACCS. Your commitment to truth strengthens child-centered safety everywhere.

PACCS Research Integrity Committee Chair – Role Description **Position Summary**

The Chair of the Research Integrity Committee (RIC) leads PACCS's scientific quality-control and research verification efforts. This role ensures that PACCS's work is grounded in accurate, verified, and responsibly interpreted evidence—protecting children's emotional and psychological safety through rigorous scientific integrity.

The Chair oversees research review processes, misinformation monitoring, legislative tracking, and fact-verification across all PACCS initiatives.

Key Responsibilities

1. Leadership & Strategy

- Establish the committee's annual priorities and workflow
- Ensure that all PACCS outputs meet research integrity standards
- Create systems for research vetting, fact-checking, and evidence review
- Coordinate with the Executive Director, President, and all committee chairs

2. Committee Oversight

- Plan and facilitate monthly committee meetings
- Assign research, review, and monitoring tasks to sub-team members
- Ensure all work is trauma-informed, accurate, and aligned with PACCS values
- Support members with guidance, training, and clarity on expectations

3. Evidence Review & Fact Verification

- Oversee fact-checking of PACCS publications, videos, trainings, and materials
- Approve final research summaries, myth–fact sheets, and briefing documents
- Ensure proper interpretation of research (no cherry-picking, distortion, or bias)

4. Policy, Legislation & Misinformation Monitoring

- Maintain an active watchlist of emerging legislation affecting child safety
- Identify harmful or helpful policies and notify PACCS leadership
- Monitor misinformation campaigns, inaccurate science claims, or harmful narratives
- Issue "alerts" or recommendations when action is needed

5. Collaboration & Communication

- Work closely with Clinical Practice, Law & Policy, Education & Outreach, and Lived Experience Committees
- Provide guidance for legislative testimony and public education materials

- Present findings and updates at board or leadership meetings as needed

6. Quality Assurance & Ethical Standards

- Uphold scientific neutrality and avoid ideological influence
- Ensure research used by PACCS reflects:
  - methodological rigor
  - trauma-informed understanding
  - accurate interpretation
  - child-centered safety principles
- Protect PACCS from misinformation, inaccurate claims, or flawed research sources

---

Qualifications

- Strong research literacy (academic, clinical, scientific, or policy background)
- Ability to evaluate evidence objectively
- Clear understanding of child-centered safety principles
- High analytical skill and attention to detail
- Collaborative leadership style and strong communication
- Ability to work across disciplines (legal, clinical, advocacy, education)

Time Commitment

Approximately 6–10 hours per month, including:

- Monthly committee meeting
- Reviewing materials
- Coordinating tasks and responding to urgent issues
- Participating in leadership discussions

Reporting Structure

- Reports to: PACCS Executive Director & President
- Works with: All PACCS committees
- Supports: Sub-team leads and research volunteers

Purpose Statement The Chair ensures PACCS remains a trusted, evidence-based authority by upholding scientific accuracy, identifying misinformation, evaluating policy risks, and integrating verified research into every level of PACCS's work.

Curriculum Development & Training Committee

CURRICULUM DEVELOPMENT & TRAINING COMMITTEE

Definition The Curriculum Development & Training Committee designs, develops, evaluates, and maintains all PACCS training programs, continuing education modules, certification tracks, and learning materials.

The committee ensures that PACCS's educational offerings are scientifically accurate, trauma-informed, child-centered, and professionally rigorous.

Structure

- Chair (Education or Clinical Training Expert)
- Instructional Designers
- Subject-Matter Experts (clinical, legal, policy, lived experience)
- Research Liaison
- Quality Assurance & Evaluation Specialist
- CEU/CLE Compliance Sub-Team

Meetings occur monthly, with ongoing project collaboration

Goals

- Create PACCS's full training library (online, in-person, hybrid)
- Develop CEU/CLE-compliant courses for clinicians, attorneys, evaluators, etc.
- Integrate research integrity and lived experience into every curriculum
- Create standardized modules on:
    - Child-centered safety
    - Alienation & False allegations
    - Coercive control
    - Child resistance
    - Ethical reunification
    - Trauma-informed practice
- Maintain a curriculum review cycle
- Establish certification pathways (e.g., PACCS-Certified Child Safety Professional™)
- Support speaker preparation, conference materials, and training decks

1-PAGE ONBOARDING — Curriculum Development & Training Committee

Welcome to the PACCS Curriculum Development & Training Committee

You will help shape the educational foundation of PACCS, creating impactful, scientifically grounded trainings that advance child-centered safety across disciplines.

Your Role

- Participate in curriculum design, review, and revision
- Ensure training reflects evidence-based practices and trauma-informed care
- Work with experts and researchers to maintain accuracy
- Help develop learning objectives, assessments, and CEU/CLE materials
- Identify gaps in knowledge and propose new modules

Guiding Principles

- Quality & accuracy
- Accessibility
- Trauma-informed design
- Child-centered safety
- Evidence-based instruction
- Interdisciplinary collaboration

What to Expect

- Monthly meetings
- Collaborative project work
- Review cycles and quality assurance tasks
- Opportunities to help create national-level child safety curriculum

Your contribution helps build the professional standards needed to protect children through education and training.

Chair Role Expectations — Curriculum Development & Training Committee

Primary Responsibilities

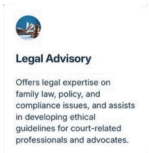
- Lead curriculum planning and development
- Ensure CEU/CLE compliance across educational offerings
- Coordinate with Research Integrity, Legal, Clinical, and Lived Experience Committees
- Oversee quality assurance and instructional design
- Approve final curriculum products before release
- Track progress, deadlines, and training outcomes
- Support presenters and training facilitators

Qualifications

- Background in curriculum design, teaching, clinical education, or instructional design
- Strong writing and organizational skills
- Ability to blend science, policy, legal standards, and lived experience
- Experience with accreditation or continuing education preferred

Time Commitment

8–12 hours monthly (depending on active curriculum cycles).



Legal Advisory

LEGAL ADVISORY COMMITTEE

Definition

The Legal Advisory Committee provides expert guidance on legal standards, statutes, case law, and policy issues affecting child-centered safety, custody, parent-child contact, and family court practices.

This committee ensures PACCS's legal materials, trainings, and public policy positions are accurate, ethical, and legally sound.

Structure

- Chair (Attorney or Legal Expert)
- Family Law Attorneys
- Child Welfare Attorneys
- Appellate Specialists
- Legal Scholars / Researchers
- Lived-Experience Legal Navigators (optional)
- Liaison to Policy & Research Integrity Committees

Meets monthly or as needed for rapid legal review.

Goals

- Review legislation, statutes, and case law relevant to PACCS
- Provide legal clarity to other committees
- Identify harmful or beneficial legal trends
- Develop child-safety–based legal briefs, summaries, and guidance
- Ensure PACCS testimony and trainings are legally accurate
- Advise on judicial education, ethical practice, and professional reform
- Support the Research Integrity Committee on legal fact-checking
- Monitor legal misinformation affecting child safety

1-PAGE ONBOARDING — Legal Advisory Committee

Welcome to the PACCS Legal Advisory Committee Your legal knowledge plays a crucial role in shaping ethical, child-centered reform. You will help ensure that PACCS operates with legal accuracy and integrity.

Your Role

- Review legal content, statutes, and claims
- Identify harmful bills, practices, or systemic risks
- Provide guidance on custody law, evidence standards, and due process
- Support legislative testimony and policy briefs
- Strengthen PACCS's educational materials with accurate, up-to-date legal knowledge

Guiding Principles

- Accuracy
- Ethical practice
- Child-centered legal safety
- Neutrality
- Evidence-based legal interpretation

What to Expect

- Monthly meetings
- Occasional rapid review requests (legislation, filings, etc.)
- Collaboration with Policy, Curriculum, and Research Integrity Committees

Your expertise ensures PACCS remains a trusted source for child-centered legal education and reform.

Chair Role Expectations — Legal Advisory Committee

Primary Responsibilities

- Lead monthly legal review meetings
- Coordinate with the Research Integrity & Policy Committees
- Identify emerging legal threats and opportunities
- Ensure all PACCS legal materials are accurate and compliant
- Develop legal education resources for trainings

Qualifications

- Licensed attorney or legal scholar
- Specialization in family law, child welfare, or constitutional law preferred
- Experience in legislative or judicial advocacy beneficial

Time Commitment

~6–10 hours monthly.

PACCS Legal Advisory Committee

Committee Description & Purpose (Handbook Version)

The Legal Advisory Committee serves as a central pillar of PACCS's mission to protect children's emotional, psychological, and physical safety by advancing integrity, accountability, and evidence-based practice within the legal system. This committee provides expert guidance on legal questions that arise within PACCS's operations, ensuring that all organizational activities, educational materials, and advocacy initiatives comply with applicable laws and nonprofit standards.

Beyond internal guidance, the Legal Advisory Committee plays a proactive, leadership role in shaping the future of child-centered legal practice. Committee members—attorneys, legal scholars, and professionals experienced in family law, child welfare, constitutional issues, and trauma-informed practice—collaborate to develop innovative strategies, protocols, and model guidelines that elevate how courts and practitioners address complex family-court dynamics, including:

- Emotional and psychological abuse
- Parental alienation
- False allegations
- Coercive control
- Interference with custody and parent-child relationships
- Systemic failures leading to unsafe outcomes

Key Functions

1. Organizational Legal Guidance

- Provide ongoing advice to PACCS leadership to ensure compliance with nonprofit law and ethical standards.
- Review PACCS publications, training materials, policies, and public communications for legal accuracy and risk mitigation.
- Support PACCS's legislative and policy advocacy efforts with accurate legal framing and analysis.

2. Development of Child-Centered Legal Protocols

The committee works to build the nation's first comprehensive legal practice frameworks grounded in child-centered safety, including:

- Model attorney protocols for managing high-conflict custody cases involving psychological abuse or coercive dynamics
- Recommended standards for evidence presentation, child-voice considerations, and trauma-informed practice

- Courtroom strategies and ethics guidance for identifying and preventing misuse of the legal system through false allegations or obstructive behaviors

3. Professional Training & Applied Practice Models

Chairs and committee members will design applied learning tools to transform family-court practice nationwide. Examples include:

- A recorded mock trial demonstrating a child-centered safety approach in cases involving alienation, coercive control, or emotional abuse
- Step-by-step litigation guides for attorneys and judges
- Continuing legal education (CLE) modules showcasing effective, ethical, science-based advocacy
- Templates for legal motions, evidentiary checklists, and courtroom scripts that model best practices
- Models and guidance on “out of the box” strategies that prioritize child safety

These resources will be used to train attorneys, judicial officers, and allied professionals in creating efficient, accountable, and child-safety–focused legal processes.

4. Policy Leadership & Reform

The committee supports PACCS’s broader policy mission by:

- Drafting recommended statutory language or amendments
- Providing expert review of proposed legislation
- Crafting model state policies that promote consistent, evidence-based decision-making in custody and child-safety matters
- Collaborating with researchers to integrate scientific findings into legal standards and reforms

Vision

The Legal Advisory Committee envisions a legal system where:

- Children’s emotional and psychological safety is treated with the same seriousness as physical safety
- Attorneys are equipped with clear, ethical, science-based frameworks
- Courts can reliably distinguish true abuse from false allegations or coercive manipulation
- Families can access fair, efficient processes that prevent prolonged harm and promote healing

Through strategic innovation and professional collaboration, the committee will help build a nationwide shift toward child-centered safety as the foundation of family-court practice.

Advisory council

ADVISORY COMMITTEE

(General advisory committee for PACCS leadership & strategic guidance)

Definition

The Advisory Committee is a multidisciplinary group of seasoned professionals—clinicians, researchers, attorneys, advocates, educators, and leaders—who provide strategic insight, expert guidance, and high-level review of PACCS programs, policies, and initiatives.

The committee does not govern PACCS; instead, it serves as a consultative body offering expertise, foresight, and stability. Its purpose is to ensure that all PACCS decisions reflect best practices, ethics, scientific credibility, and child-centered safety.

Structure

- Advisory Committee Chair
- Vice Chair (optional)
- Subject-Matter Experts (invited or appointed)
    - Clinical specialists
    - Researchers
    - Legal professionals
    - Policy experts
    - Trauma, child development, & mental health professionals
    - Individuals with lived experience
- Ex Officio Members (President, Executive Director)

Meetings may be quarterly or as needed for high-level review.

Goals

- Provide non-governing guidance to PACCS leadership
- Offer expert review of policy proposals, strategic initiatives, and messaging
- Identify strategic risks and emerging opportunities
- Ensure scientific, clinical, and ethical integrity across PACCS
- Connect PACCS with external leaders, institutions, and partnerships
- Strengthen organizational credibility and long-term sustainability

---

1-PAGE ONBOARDING — Advisory Committee

Welcome to the PACCS Advisory Committee

You are joining a group of trusted experts providing high-level insight that shapes the direction, ethics, and impact of PACCS. Your expertise helps ensure the organization remains scientifically grounded, strategically effective, and child-centered.

Your Role

- Offer expert perspective, not operational management
- Review key PACCS initiatives and provide strategic guidance
- Identify risks, opportunities, partnerships, and gaps
- Support the leadership team through consultation and expertise
- Speak neutrally and professionally on issues tied to child safety

Guiding Principles

- Integrity
- Child-centered safety
- Evidence-based guidance
- Professional neutrality
- Respect for interdisciplinary perspectives

What to Expect

- Quarterly meetings
- Occasional requests for review or consultation
- A collaborative, respectful environment

Your expertise strengthens the mission of protecting children through science, ethics, and informed leadership.

Chair Role Expectations — Advisory Committee

Primary Responsibilities

- Lead quarterly meetings
- Serve as liaison between Advisory Committee and PACCS leadership
- Set agendas and prioritize strategic areas for consultation
- Ensure a diverse range of expert viewpoints is represented
- Coordinate feedback and deliver clear guidance to leadership

Qualifications

- Recognized expertise (clinical, legal, research, policy, advocacy, etc.)
- Strong communication skills
- Ability to provide neutral, strategic advice

Time Commitment

~4–6 hours per month.
